

## ANNUAL PROGRESS REPORT FOR SDG 2 – 2024

### 17.3.2. University publishes progress against SDG 2

St. Peter's Institute of Higher Education and Research (SPIHER) is dedicated to contributing to Sustainable Development Goal 2 (SDG 2): Zero Hunger, which aims to end hunger, achieve food security, improve nutrition, and promote sustainable agriculture. SPIHER's efforts focus on providing innovative solutions to address food insecurity, improving agricultural productivity, and enhancing nutritional awareness in underserved communities.

SPIHER is actively involved in promoting sustainable agricultural practices to enhance food security, particularly in rural and marginalized areas. The university collaborates with local farmers to introduce modern farming techniques that improve crop yield, reduce dependency on harmful chemicals, and promote the sustainable use of resources. Through agricultural innovation workshops and training programs, SPIHER helps farmers adopt techniques like precision farming, organic agriculture, and water-efficient practices.

SPIHER supports Zero Hunger by promoting food security, sustainable agriculture, and nutrition awareness. The university organizes community outreach programs and awareness campaigns on balanced diets and sustainable food practices. Through its NSS and extension activities, SPIHER engages students in initiatives that support local farmers and food distribution drives for underprivileged communities. The campus also encourages research on sustainable farming techniques and waste reduction. By fostering empathy, social responsibility, and sustainable agricultural practices, SPIHER contributes to building a hunger-free and nutritionally secure society.

#### Food Safety Measures

**Name of the Event : “Food Safety Measures”**

**Date of the Event : 14.08.2024**

**Venue : Cafeteria – SPIHER Campus**

Implementing food safety measures at an institute campus in compliance with guidelines from the Food Safety and Standards Authority of India (FSSAI) is essential for ensuring the health and well-being of students, faculty, and staff.

- Choose foods processed for safety.
- Cook food thoroughly.
- Eat cooked foods immediately.
- Avoid contact between raw foods and cooked foods.
- Wash hands repeatedly.
- Keep all kitchen surfaces meticulously clean.

Existing Food Items	New Food Items Suggested
<p><b>Breakfast and Lunch Menu:</b></p> <p>Idli, Dosa, Chapati, <i>Parotta Pongal</i>, <i>Rava pongal</i>, <i>Sweet pongal</i>, <i>Poori</i>, <i>Vada</i></p> <p><i>Chicken Biryani</i> , <i>Mutton biryani</i>, <i>Egg biryani</i>, <i>Veg Biryani</i></p> <p><b>Bottle Juice and Fresh Juice Items:</b>                      Apple juice, lime, mango,                      Orange.</p>	<p><i>Idiyappam</i>, <i>Puttu</i>, <i>Appam</i> , <i>Ragi Dosa</i>, <i>Upma</i>, <i>Bread Oats</i>, <i>Mushroom</i>, <i>Wheat dosa</i>, <i>Cheese dosa</i>, <i>Puttu Adai</i>, <i>Semiya upma</i>, <i>Ragi Roti</i>, <i>Ragi idli</i>, <i>Rava kichadi</i>, <i>Neer Dosa</i></p> <p><b>All Fruits Items</b></p> <p><b>Fresh Juice Items:</b></p> <p>Sugar cane, Grape, Pear, Water melon, Pine apple, Blueberry, Cherry, Pomegranate, Mosambi, Tomato, Carrot</p>

**Conclusion:**

Adhering to these FSSAI guidelines will help ensure that the food provided on campus is safe, nutritious, economical and of high quality. Regular monitoring, and updates to food safety practices are crucial for maintaining compliance, protecting the health of all campus members and ensuring food for all people following ‘No Hunger’.

### Certificate of Contribution

A certificate of contribution was awarded in recognition of active participation in global **Hunger Awareness and Action** initiatives. This engagement reflects a strong commitment to strengthening international cooperation and supporting global efforts to eradicate hunger, which focuses on individual and institutional contribution towards global partnerships for sustainable development. The awareness initiative aimed to highlight the challenges faced by vulnerable populations across the world, promote responsible consumption, and inspire collective action to address food insecurity. Through participation in campaigns, discussions, and outreach activities, the contributor helped amplify global messages on hunger elimination and mobilized support for humanitarian efforts. This recognition demonstrates meaningful involvement in **global advocacy**, reinforcing the importance of cross-border solidarity and public participation in solving shared challenges. The certificate serves as evidence of the contributor's role in advancing **SDG 17**, by supporting international cooperation, fostering awareness, and contributing to global humanitarian actions aimed at ensuring **Zero Hunger**.

**ARTICLE INFO**

**ABSTRACT**

Larger part of the families in India picked agriculture as their favoured work for living, however the present rancher face confronting issues and difficulties. One of the significant issues of agribusiness is neglected to gauge or obsession of costs for items due to ignorance, bombed gauge interest, absence of mindfulness about innovation, fizzled choose what to create and when to deliver, numerous farmers are occasional producers, many are relying upon storm, absence of use of assets, water issues, need drives by state run administrations and absence of mindfulness about government plans and brokers impedance in sales. Rising changes in farming like electronic market, model demonstration, warehousing, promise advance, contract cultivating, and so on are introducing open doors for new organizations of business sectors which are successful in answering to request and supply. These changes will require speculation. India is a worldwide forerunner in the creation of heartbeats and milk, second in foods grown from the ground, tea, sugarcane, and cotton and third in oats. One in each five people in the nation is poor. Electronic National Agriculture Market (e-NAM) for farming showcasing can be viewed as an innovation which will acquire a social change market. Approachable, widespread and innovative markets definitely assist farmers. Government should bring awareness to our farmer's regarding sale of produce through e-NAM throughout India.

**Keywords:** *Issue of agribusiness; Electronic National Agriculture Market (e-NAM); government assistance; Farming crops.*

**Introduction**

Agriculture is the most customary and legacy work of the country, 65 percentage of the business made and 16 percentage of GDP commitment by the agriculture area. Greater part of populace of India lived in provincial region and their business is agribusiness, numerous farmers are relying upon rainstorm for developing harvests exceptionally less level of the ranchers having water system office. Government set out many open doors for promoting of agricultural items yet those offices covered by mediators and specialists. Numerous ranchers are unskilled and not mindful regarding innovation, market investigation and costs. Ranchers are relying upon customary strategy for creation and which are chosen by top of the family. With agriculture farmers can run poultry cultivating, dairy cultivating and become the business rancher. Indian agriculture has become progressively market situated and popularized. During 1950s, around 35 percentage of produce was cultivated, and then it increased to 70 percentages. 25 percentages of products like milk, meat, fish and eggs are spoiled due to lack of proper storage. The assessed misfortunes in products of the soil are considerably higher, 30-40 percentage. **(8)**

The government has set an objective of multiplying rancher pay by 2024. It is going to different lengths and a multi-pronged way to deal with help farmers, right from planting to collect to deals. The government has declared a venture of Rs 1.5 lakh crore to fabricate farm entryway framework and backing operations needs for ranchers and related networks. The work deficiencies have affected crop gathering by and large. In spite of customarily being an agrarian economy, agriculture in India has been tormented by earth animated issues around low yield and harvest disappointment. These have come about because of flighty climatic circumstances or from its dependence on informal farming practices because of an absence of schooling. For example, finished or under-water system, absence of successful harvest turn, and sub-standard utilization of manures altogether sway soil ripeness after some time, accordingly hampering yield levels. The issues can be

## 2024 Book Chapters in SDG 2

### Conclusion:

In conclusion, the institution's active involvement in various international events, global awareness programmes, and impactful research publications has strengthened its contribution to SDG 17.3.2. Through participation in humanitarian campaigns: such as hunger awareness initiatives and by engaging in international conferences and collaborative activities, the institution has promoted global cooperation and people-centered partnerships.

Research publications co-authored with international scholars further demonstrate a strong commitment to knowledge sharing that benefits society. These efforts help address human needs, encourage collective responsibility, and build a spirit of global solidarity. Overall, the combination of humanitarian action, global events, and collaborative research reflects the institution's dedication to advancing SDG 17.3.2 by supporting international partnerships that place human well-being at the core of sustainable development.
